News this week

Getting involved

We now have six different groups you can get involved in to help save the Hippodrome, depending on your time and interests. As well as the **Core** Group (weekly detailed business meetings) and the **Steering** Group (every five to ten weeks, for all active members), we are creating sub-groups as well as the regular business meetings. Along with these two groups the newer ones are:

3. Comms and PR
4. Design and Architecture (which can run mini-projects)
5. Finance and Business Planning
6. Property and Legal (to acquire and envelope).

Call to Action – email us with the group you would like to join **info@hulmehippodrome.org.uk**

Next steps

People who have seen some of the videos and photos will appreciate the building has a very complicated layout of rooms, large spaces, stairways, and corridors. Although we have some copies of old floorplans we don't yet have a decent set of current drawings. There were some changes in the 1970s – new bars, etc. Once we have had a systematic look inside we can go through the following stages:

1. Draw out the current **internal layout**
2. This will inform the **business plan** (for example - which spaces can be viable as rooms to hire for meetings, to rent as offices and workspaces, for exhibition space, areas for performance, and more)
3. This will inform the **design options**.

This illustrates how the sub-groups will be helping each other. The property group finds out the current layout, feeds the drawings to the business planning group, which analyses them and passes the drawings and planned space uses to the design group.

And how a viable business plan will help us in our attempts to acquire the building.
